Assignment - Introduce yourself and tell us why you chose this course.

Hello, I am Kavyasree from Hyderabad. I have completed my bachelors in electrical and electronic engineering in 2020. I believe time is very precious so I wanted to use every minute efficiently, this belief of mine paved the steps to start an institute that tutored about 50 students as my part time work. This phase in my life taught many things like ownership, think big.

During the pandemic, I have developed an immense interest in data science. I have gone through some courses in online like Coursera … but in a while I got placed in Amazon as a Catalog Associate.

I am working there from past 1 year and also learnt many new things like to dive deep, customer obsession etc.

But my interest to learn data science remained incomplete, so at a moment I have realized that I have to resume my learning in data science and set my career there.

I know that I have to start my process to reach my goal but I needed a complete guidance along with industrial approach of learning to get excel in my career and provide me ample opportunities to learn Data Science in depth. In the process of my search, I have known about EDYODA

 After seeing the curriculum and past achievements, I showed up my interest and started learning stuff.

This is very important to keep my 100 percent efforts to reach my goal and set my career in Data Science field.
